

**5A LOW DROPOUT LINEAR REGULATOR****AZ1084****General Description**

The AZ1084 is a series of low dropout positive voltage regulators with a maximum dropout of 1.5V at 5A of load current.

The AZ1084 is available in 1.5V, 1.8V, 2.5V, 2.85V, 3.3V and 5.0V versions. The fixed versions integrate the adjust resistors. It is also available in an adjustable version which can set the output voltage with two external resistors.

The series features on-chip thermal limiting which provides protection against any combination of overload and ambient temperatures that would create excessive junction temperatures. It also includes a trimmed bandgap reference and a current limiting circuit.

The AZ1084 series is available in standard packages of TO-263-2L, TO-263-3L, TO-220 and TO-252.

**Features**

- Available in 1.5V, 1.8V, 2.5V, 2.85V, 3.3V, 5.0V and adjustable versions
- Low dropout voltage: 1.3V typically at 5A
- Current limiting and thermal protection
- Low dropout voltage
- Output current: 5A
- Current limit: 6.5A
- Operating junction temperature range: 0 ~ 125°C
- Line regulation: 0.015% (typ.)
- Load regulation: 0.2% (typ.)

**Applications**

- High efficiency linear regulators
- Battery chargers
- Post regulation for switching supply
- Microprocessor supply
- Desktop PCs, RISC and embedded processors' supply

**Absolute Maximum Ratings (Note 1)**

Parameter	Symbol	Min	Max	Unit
Operating Junction Temperature Range	$T_J$		150	°C
Storage Temperature Range	$T_S$	-65	150	°C
Lead Temperature (Soldering, 10 sec.)	$T_{LEAD}$		300	°C
ESD (Human Body Model)	ESD		2000	V

Note 1: Stresses greater than those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "Recommended Operating Conditions" is not implied. Exposure to "Absolute Maximum Ratings" for extended periods may affect device reliability.

**Recommended Operating Conditions**

Parameter	Symbol	Min	Max	Unit
Input Voltage	$V_{IN}$		12	V
Operating Junction Temperature Range	$T_J$	0	125	°C
