THE MATERIAL CONTAINED IN THIS DOCUMENT IS PROVIDED "AS IS," AND IS SUBJECT TO BEING CHANGED, WITHOUT NOTICE, IN FUTURE EDITIONS. FURTHER, TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, AGILENT DISCLAIMS ALL WARRANTIES, EITHER EXPRESS OR IMPLIED WITH REGARD TO THIS MANUAL AND ANY INFORMATION CONTAINED HEREIN, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. AGILENT SHALL NOT BE LIABLE FOR ERRORS OR FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES IN CONNECTION WITH THE FURNISHING, USE, OR PERFORMANCE OF THIS DOCUMENT OR ANY INFORMATION CONTAINED HEREIN. SHOULD AGILENT AND THE USER HAVE A SEPARATE WRITTEN AGREEMENT WITH WARRANTY TERMS COVERING THE MATERIAL IN THIS DOCUMENT THAT CONFLICT WITH THESE TERMS, THE WARRANTY TERMS IN THE SEPARATE AGREEMENT WILL CONTROL.

# **DFARS/Restricted Rights Notice**

If software is for use in the performance of a U.S. Government prime contract or subcontract, Software is delivered and licensed as "Commercial computer software" as defined in DFAR 252.227-7014 (June 1995), or as a "commercial item" as defined in FAR 2.101(a) or as "Restricted computer software" as defined in FAR 52.227-19 (June 1987) or any equivalent agency regulation or contract clause. Use, duplication or disclosure of Software is subject to Agilent Technologies' standard commercial license terms, and non-DOD Departments and Agencies of the U.S. Government will receive no greater than Restricted Rights as defined in FAR 52.227-19(c)(1-2) (June 1987). U.S. Government users will receive no greater than Limited Rights as defined in FAR 52.227-14 (June 1987) or DFAR 252.227-7015 (b)(2) (November 1995), as applicable in any technical data.

## **Table of Contents**

Cable and Antenna Analyzer	4
Network Analyzer (Option 303)	8
Time Domain (Option 010)	9
Spectrum Analyzer (Option 230 and 231)	13
Preamplifier (Option 235)	21
Interference Analyzer (Option 236)	21
Channel Power Meter (Option 311)	22
Power Meter (Option 302)	22
Remote Control Capability (Option 030)	22
General Information	23
Supported Cal Kits	26

## **Definitions**

#### Specification (spec.)

Warranted performance. Specifications include guardbands to account for the expected statistical performance distribution, measurement uncertainties, and changes in performance due to environmental conditions. The following conditions must be met:

- FieldFox has been turned on at least 90 minutes
- FieldFox is within its calibration cycle
- Storage or operation at 25°C ±5 °C range (unless otherwise stated)

#### Typical (typ.)

Expected performance of an average unit over a 20 °C to 30 °C temperature range after being at ambient temperature for two hours, unless otherwise indicated; does not include guardbands. It is not covered by the product warranty. The FieldFox must be within its calibration cycle.

#### Nominal (nom.)

A general, descriptive term or design parameter. It is not tested, and not covered by the product warranty.

#### Calibration

The process of measuring known standards to characterize an instrument's systematic (repeatable) errors.

#### Corrected (residual)

Indicates performance after error correction (calibration). It is determined by the quality of calibration standards and how well "known" they are, plus system repeatability, stability, and noise.

#### Uncorrected (raw)

Indicates instrument performance without error correction. The uncorrected performance affects the stability of a calibration.

# Cable and Antenna Analyzer

Description	Specification	Typical		Supplemental Information
		10 minute warm up	90 minute warm up

# Cable and Antenna Analyzer (continued)

Description	Specification	Supplemental Information
Distance-to-Fault		
Horizontal Range	Range = [(number of points - 1) / frequency span * 2] * velocity factor * speed of light	Number of points auto coupled according to start and stop distance entered
Horizontal Resolution	Resolution = Range $/$ (number of points $-$ 1)	Number of points settable by user
Bandpass Mode Window Types		Maximum, medium, and minimum windows

<sup>&</sup>lt;sup>1</sup> Using recommended calibration kits.

Figure 1: CAT Mode, Type—N Calibration Kit — Magnitude (Specification)

<sup>&</sup>lt;sup>2</sup> Higher cable losses can be measured using transmission or S21 measurements. Cable losses measured in transmission mode limited by transmission dynamic range.

<sup>&</sup>lt;sup>3</sup> QuickCal is performed with the connect LOAD step.

## Cable and Antenna Analyzer (continued)

Figure 2: CAT Mode, QuickCal – Magnitude (Typical)

Figure 3: CAT Mode, Preset Cal – Magnitude (Typical)

# Network Analyzer (Option 303)

The following CAT mode performance parameters apply to NA mode: frequency accuracy, frequency resolution, output power, directivity, source match, reflection tracking, and reflection and transmission dynamic range. NA mode performance that is in addition to CAT mode is listed in the table below.

Description	Specification	Supplemental Information	
Frequency Range			
	2 MHz to 4 GHz	Option 104	
	2 MHz to 6 GHz	Option 106	
Measurement Speed			
S11: 1.75 GHz – 3.85 GHz, 1001 Points, Cal ON		1.5 ms/point (nominal)	
S21: 1.78 GHz – 2.06 GHz, 201 Points, Cal ON		1.9 ms/point (nominal)	
S11 Phase Uncertainty <sup>1</sup>			
	See Figure 5 on following page		
Display Range	-180° to +180°		
System Impedance			
	$50\Omega$ (nominal)	$75\Omega$ with appropriate adapter and Cal Kit	

<sup>&</sup>lt;sup>1</sup> Using recommended calibration kits.

Description	Information
Measurements	S11 magnitude and phase
	S21 magnitude (option 110)
	A receiver magnitude
	R receiver magnitude
Formats	Log magnitude, Linear magnitude Available ONLY for S11: VSWR, Phase, Smith Chart, Polar, Group delay, Unwrapped phase
Resolution	101, 201, 401, 601, 801, 1601, 4001, 10001
(Number of data points)	Custom number of points can be set using SCPI
Averaging	Sweep and point averaging; 2 to 999 points.
Number of traces	Four traces available. Tr1, Tr2, Tr3, Tr4
Data markers	Each trace has six independent markers that can be displayed simultaneously. Delta markers are available for each marker.
Marker formats	Default marker format is the trace format. In Smith chart or polar format,
	[Real +Imag] or [Mag and Phase] formats are also available.
Marker functions	Peak, Next Peak, Peak Left, Peak Right, Mkr→ Center, Min Search, Peak Excursion, Peak Threshold, Target, Bandwidth, Tracking
Display formats	Single-trace
	Dual-trace overlay (both traces on one graticule)
	Dual-trace split (each trace on separate graticules)
	Three-trace overlay (all three traces on one graticule)

	Three-trace split (each trace on separate graticules)
	Quad-trace split (each trace on separate graticules)
Display data	Display data, memory, data and memory, or data math
Trace math	Vector division or subtraction of current linear measurement values and memory data.
Scale	Autoscale, scale, reference level, reference position
	Autoscale: Automatically selects scale resolution and reference value to center the trace. Autoscale all scales all visible traces.
Title	Add custom titles to the display.
Limit lines	Define test limit lines that appear on the display for go/no go testing. Lines may be any combination of horizontal, sloping lines, or discrete data points. Each trace can have its own limit line.
	Limit Lines can be Fixed, Relative to center frequency and reference level, and can be built from existing traces.

# Time Domain (Option 010)

Using time domain, data from transmission or reflection measurements in the frequency domain are converted to the time domain. The time-domain response shows the measured parameter value versus time.

Description	Information
Time stimulus modes	
Low-pass step	Similar to a traditional time domain reflectometer (TDR) stimulus waveform, Low-pass step is used to measure low-pass devices. The frequency-domain data should extend from DC (extrapolated value) to a higher value.
Low-pass impulse	Also used to measure low-pass devices
Bandpass impulse	Stimulates a pulsed RF signal and is used to measure the time-domain response of band-limited devices
Windowing	Windowing is used to filter the frequency-domain data and thereby reduce overshoot and ringing in the time-domain response.
Gating	Gating is used to selectively remove reflection or transmission time-domain responses. When converted back to the frequency domain, the effects of the responses outside the gate are removed.

FREQUENCY		
Frequency Range		
Option 230	100 kHz to 4 GHz	Usable to 5 kHz <sup>1</sup>
Option 231	100 kHz to 6 GHz	Usable to 5 kHz <sup>1</sup> Tunable to 6.1 GHz
Frequency Reference		
Accuracy	±2 ppm	
Aging Rate	± 1 ppm/yr	
Temperature Stability	$\pm$ 1 ppm over $-10$ to 55 °C	
Frequency Readout Accuracy	(start, stop, center, marker)	
	± (readout frequency x frequency reference accuracy + RBW centering + 0.5 x horizontal resolution)	Horizontal resolution = span/(trace points - 1)  RBW centering:  5% x RBW, FFT mode (nominal)  16% x RBW, Step mode (nominal)
Frequency Span		
Range	0 Hz (zero span), 10 Hz to max freq	
Accuracy	±(2 x RBW centering + horizontal resolution)	$\pm$ (2 x RBW centering +2 x horizontal resolution) for detector = Normal
Resolution	1 Hz	
Sweep Time, <b>Span = 0 Hz</b>		
Range		
Minimum	1.0 us	
Maximum		
RBW = 2 MHz	2.18 ms	
RBW = 1 MHz	3.28 ms	
RBW = 300  kHz	5.46 ms	
RBW = 100  kHz	16.38 ms	
RBW = 30  kHz	54.60 ms	
RBW = 10  kHz	163.84 ms	
RBW = 3 kHz	546.00 ms	
RBW = 1 kHz	1.64 s	
RBW = 300 Hz	2.54 s	
Resolution	100.0 ns	
Readout	Entered value representing trace horizontal scale range.	

<sup>&</sup>lt;sup>1</sup>With signal at center frequency.

Description	Specification	Supplemental Information
Sweep Acquisition, Span > 0 Hz		
Range	1 to 5000. Number of data acquisitions per trace point. Value is normalized to the minimum required to achieve amplitude accuracy with CW signals.	Auto coupled. For pulsed RF signals manually increase the sweep acquisition value to maximize the pulse spectrum envelope.
Resolution	1	
Readout	Measured value representing time required to tune receiver, acquire data, and process trace.	
Trigger		
Trigger Type	Free Run, Video, External	
Trigger Slope	Positive, Negative edge	
Trigger Delay		
Range	0 to 10 sec	
Resolution	100 nsec	
Auto Trigger	Forces a periodic acquisition in the absence of a trigger event	
Auto Trigger Range	0 sec (OFF) to 10 sec	
Time Gating		
Gate Method	Triggered FFT	
Gate Delay Range	Same as Trigger Delay	
Trace Update		
Span = 20 MHz, RBW = 3 kHz		1.5 updates/s (nominal)
Span = 100 MHz, RBW auto coupled		7 updates/s (nominal)
Span = 6 GHz, RBW auto coupled		1 update/s (nominal)
Trace Points		
	101, 201, 401, 601, 801, 1001 (Defaults to 401)	

Description	Specification	Supplemental Information
Resolution Bandwidth (RBW)		
Range (-3 dB bandwidth)		
Zero Span	300 Hz to 1 MHz in 1–3–10 sequence; 2 MHz	
Non–Zero Span	10 Hz to 300 kHz in 1/1.5/2/3/5/7.5/10 sequence; 1 MHz, 2 MHz	Step keys change RBW in 1–3–10 sequence
Accuracy		
1 kHz to 1 MHz		± 5% (nominal)
10 Hz to 100 kHz non– zero span		± 1% (nominal)
2 MHz		± 10% (nominal)
300 Hz zero span		± 10% (nominal)
Selectivity (-60 dB/ -3 dB)		4:1 (nominal)
Video Bandwidth (VBW)		
Range	1 Hz to 2 MHz in 1/1.5/2/3/5/7/10 sequence	VBW ≥ RBW in zero span

# Figure 10

Figure 11

**Description** Specification

#### **Independent Signal Source or Tracking Generator**

The independent source or tracking generator is included with either spectrum analyzer option. The source can be used in continuous wave (CW) or stimulus/response (S/R) mode. In CW mode, the source frequency is independent of the receiver frequency. The source can be tuned to a frequency that is different from the receiver. In stimulus/response mode, the source operates the same as a traditional tracking generator - the receiver tracks the source.

#### Frequency range

2 MHz to 4 GHz (Option 230) or 2 MHz to 6 GHz (Option 231)

#### **Amplitude**

High power 2 MHz to 4 GHz < +8 dBm, +6 dBm (nominal) >4 GHz to 6 GHz <+7 dBm, +2 dBm (nominal)

Low power 2 MHz to 4 GHz <-23 dBm, -25 dBm (nominal) >4 GHz to 6 GHz < -24 dBm, -29 dBm (nominal)

Attenuation 0 to 31 dB

Functions Continuous wave, stimulus / response

Description	Specification	Supplemental Information
AM/FM Tune and Listen		
Audio demodulation types	AM, FM Narrow, FM Wide	
Audio Bandwidth	16 kHz	
Receiver IF Bandwidth		

AM	35 kHz
FM Narrow	12 kHz
FM Wide	150 kHz
Listen Time Range	0 to 100 sec.

#### **Audio Signal Strength Indicator**

Audio Signal Strength Indicator helps locate signals. The tone and frequency of the beep varies with signal strength.

#### **Radio Standards**

With a Radio Standard applied, pre-defined frequency bands, channel numbers or Uplink / Downlink selections can be used instead of manual frequency entry. The pre-defined FieldFox Radio Standards include bands such as W-CDMA, LTE, and GSM. Custom Radio Standards can also be defined, imported, and applied to the FieldFox.

#### FieldFox Power Suite Measurement types

Channel Power
Occupied Bandwidth
Adjacent Channel Power Ratio

# Preamplifier (Option 235)

Description	Specification	Typical 10 minute warm up
Frequency Range		
Option 230	100 kHz to 4 GHz	
Option 231	100 kHz to 6 GHz	
Gain		22 dB

## Interference Analyzer (Option 236)

Description	Specification	Supplemental Information
Display Types		
Spectrogram	Overlay, full screen, top, or bottom with active trace	
Waterfall		
Markers		
	Time, delta time	

## Channel Power Meter (Option 311)

Channel power meter is a built-in power measurement that application does not require an external power sensor. Set the center frequency and channel bandwidth. The results are shown on a large analog display.

' '	0 0 1 7	
Description	Specification	Typical
Frequency range:		
	100 kHz to 4/6 GHz	
Power accuracy		
2 MHz to 10 MHz	±1.8 dB	±0.60 dB
> 10 MHz to 3.0 GHz	±1.5 dB	±0.50 dB
> 3.0 GHz to 5.0 GHz	±1.9 dB	±0.60 dB
> 5.0 GHz to 6.0 GHz	±2.1 dB	±0.60 dB

## Power Meter (Option 302)

The external USB power sensor option supports various Agilent USB Power Sensors. For an updated list of supported power sensors, visit <a href="http://www.agilent.com/find/fieldfoxsupport">http://www.agilent.com/find/fieldfoxsupport</a>

## Remote Control Capability (Option 030)

Option 030 adds remote control capability to FieldFox analyzers, so that FieldFox can be controlled via an iOS device. The FieldFox app, running on the iOS device, combined with Option 030 on the FieldFox analyzer provides full control of the instrument from a remote location. The app emulates the front panel of FieldFox, so users can press the FieldFox hardkeys or softkeys using their iPhone or iPad, and make measurements remotely.

- iOS device requirements
- iPhone, iPad, or iPod Touch
- iOS of 5.1 or higher
- A WiFi or 3G/4G connection

The FieldFox app communicates with FieldFox via a network connection, so both the iOS device and FieldFox need to be on a network where both devices can reach the other. For example, a company intranet or a site installation using a wireless router. FieldFox can directly be connected to a LAN cable, or if wired LAN is not available, a user supplied wireless router can be configured to work with FieldFox.

#### FieldFox app without Option 030

The FieldFox app can be installed on an iOS device independent of the presence of Option 030 on the analyzer. Without Option 030, users can view the live display screen of their FieldFox remotely, but cannot control the instrument. With 030 purchased and installed on their FieldFox, users can both view and control their FieldFox.

Option 030 and the FieldFox app are not applicable to Android, BlackBerry, or Windows phone/tablet devices..

AC Power	−10 to 55 °C		
Battery	–10 to 50 °C	–10 to 55 °C	
Storage	–51 to 71 °C		With the battery pack removed. The battery packs should be stored in an environment with low humidity. Extended exposure to temperature above 45 °C could degrade battery performance and life.
EMC			
Complies with European EMC Directive 2004/108/EC	<ul> <li>IEC/EN 61326-2-1</li> <li>CISPR Pub 11 Group 1, class A</li> <li>AS/NZS CISPR 11</li> <li>ICES/NMB-001</li> </ul>		When subjected to continuously present radiated electromagnetic phenomena, some degradation of performance may occur
ESD			
	• IEC/EN 61000-4-2		Functional up to 20 kV test <sup>1</sup>
Safety			
Complies with European Low Voltage Directive 2006/95/EC	<ul> <li>IEC/EN 61010–1 2<sup>nd</sup> Edition</li> <li>Canada: CSA C22.2 No. 61010–1–04</li> <li>USA: UL 61010–1 2<sup>nd</sup> Edition</li> </ul>		

Description	Specification	Typical	Supplemental Information
Power			
Power Supply			
External DC Input	15 to 19 VDC		40 W maximum when battery charging
External AC Power Adapter			Efficiency Level IV, 115 VAC
Input	100 to 250 VAC, 50 to 60 Hz 1.25 – 0.56 A		
Output	15 VDC, 4 A		
Power Consumption			
On		12 W	
Battery			
	10.8 V, 4.6 A-h		Lithium ion
Operating Time		4 hours	
Charge Time	A fully discharged battery takes about 1.5 hours to recharge to 80%, 4 hours to 100%		
Discharge Temperature Limits	-10 to 60 °C <sup>2</sup> , ≤ 85% RH		
Charge Temperature Limits	0 to 45 °C <sup>2</sup> , ≤ 85% RH		
Storage Temperature Limits	–20 to 50 °C², ≤ 85% RH		The battery packs should be store in an environment with low humidity. Extended exposure to temperature above 45 °C could degrade battery performance and life
Data Storage			
Internal	Minimum 16 MB		Up to 1000 instrument states an trace
External			Supports USB 2.0 compatible memory devices; Supports miniS and miniSDHC memory cards
Display			
	6.5" transflective color VGA LED- backlit		
	640 x 480 with anti–glare coating		
Weight			
	2.8 kg (6.2 lbs) including battery		
Dimensions (H x W x D)			
	292 x 188 x 72 mm (11.5" x 7.4" x 2.8")

<sup>1</sup> Samples of this product have been type tested in accordance with the Agilent Environmental Test Manual (ETM) for outdoor equipment (OE) and verified to be robust against the environmental stresses of storage, transportation and end use; those stresses include but are not limited to temperature, humidity, shock, vibration, altitude and power line conditions.

<sup>2</sup> Charge and discharge temperatures are internal temperatures of the battery as measured by a sensor embedded in the battery. The Battery screen displays temperature information. To access the screen, select System, Service Diagnostics, and Battery

#### **Supported Cal Kits**

The following list of calibration kits are loaded in the FieldFox. You can add additional calibration kits to the FieldFox using FieldFox Data Link Software.

The basic 50-ohm QuickCal does not require cal standards. However, for higher accuracy, perform QuickCal with a load. 75-ohm QuickCal does require a 75-ohm load.

Model number	Description
N9910X-800	3-in-1 OSL calibration kit, DC to 6 GHz, Type-N (m) 50 ohm
N9910X-801	3-in-1 OSL calibration kit, DC to 6 GHz, Type-N (f) 50 ohm
N9910X-802	3-in-1 OSL calibration kit, DC to 6 GHz, 7/16 DIN (m)
N9910X-803	3-in-1 OSL calibration kit, DC to 6 GHz, 7/16 DIN (f)
85031B	Economy calibration kit, DC to 6 GHz, 7 mm
85032E	Economy calibration kit, DC to 6 GHz, Type-N, 50-ohm
85032F	Standard calibration kit, DC to 9 GHz, Type-N, 50-ohm
85033E	Standard calibration kit, DC to 9 GHz, 3.5 mm
85036B	Standard calibration kit, DC to 3 GHz, Type-N 75-ohm
85036E	Economy calibration kit, DC to 3 GHz, Type-N 75-ohm
85038A	Standard calibration kit, DC to 7.5 GHz, 7-16
85039B	Economy calibration kit, DC to 3 GHz, Type-F, 75-ohm
85052D	Economy calibration kit, DC to 26.5 GHz, 3.5 mm
85054B	Standard calibration kit, DC to 18 GHz, Type-N, 50-ohm
85054D	Economy calibration kit, DC to 18 GHz, Type-N, 50-ohm
85514A	Calibration kit, 4-in-1, open, short, load and through, DC to 9 GHz, Type-N(m), 50
85515A	Calibration kit, 4-in-1, open, short, load and through, DC to 9 GHz, Type-N(f), 50
85516A	Calibration kit, 4-in-1, open, short, load and through, DC to 3 GHz, Type-N(m), 75 ohm
85517A	Calibration kit, 4-in-1, open, short, load and through, DC to 3 GHz, Type-N(f), 75 ohm

## FieldFox Data Link Software

FieldFox Data Link software, installed on a PC, provides the following capabilities:

- Capture of current trace and settings
- Opening of data files (s1p, s2p, csv, sta, and png) residing on the instrument
- Editing cal kit and cable files on the instrument, or creating new cal kits and cables
- Transferring files to/from the instrument
- Annotating plots for documentation purposes
- . Marker, limit line, and format changes on the PC
- Report generation
- Printing function

FieldFox Data Link software is available from the following website:

http://www.agilent.com/find/fieldfoxsupport

#### Remove all doubt

Our repair and calibration services will get your equipment back to you, performing like new, when promised. You will get full value out of your Agilent equipment throughout its lifetime. Your equipment will be serviced by Agilent-trained technicians using the latest factory calibration procedures, automated repair diagnostics and genuine parts. You will always have the utmost confidence in your measurements.

Agilent offers a wide range of additional expert test and measurement services for your equipment, including initial start-up assistance onsite education and training, as well as design, system integration, and project management.

For more information on repair and calibration services, go to:

www.agilent.com/find/removealldoubt

#### **Agilent Email Updates**

#### www.agilent.com/find/emailupdates

Get the latest information on the products and applications you select.

Agilent Open

#### www.agilent.com/find/open

Agilent Open simplifies the process of connecting and programming test systems to help engineers design, validate and manufacture electronic products. Agilent offers open connectivity for a broad range of system-ready instruments, open industry software, PC-standard I/O and global support, which are combined to more easily integrate test system development.
